Projects

TWITTER CLONE | FULL STACK DEVELOPMENT:

As a part of my internship, I developed a Twitter Clone with all the features of a twitter clone, like, tweet, retweet, likes, comments, account deletion, account change, etc. I have made this website from html and CSS, and backend withall the functionality was done by Python.

DOM PROJECTS | DOM-API:

Made several projects on DOM including **movie-app, weather-app, calculator, keyboard game, sticky notes**, **etc**. I learnt lot about API and DOM manipulation and designing.

MACHINE LEARNING PROJECTS | PYTHON (Machine Learning):

Made different machine learning models. The major of them are: **Breast Cancer Detection, Personal VirtualAssistant and Super Trend Indicator, Game Automation etc**.
