PROFESSIONAL SUMMARY

Software engineer with 3+ years building production-grade API tooling, full-stack web platforms, and developer-facing products. Led the OpenAPI Visual Design module at Apiwiz — an end-to-end Swagger/OpenAPI specification builder with version control and reusable component libraries. Previously at Reliance Jio (Nowfloats), architected the Jio Loans full-stack system and delivered the Jio Finance website. Strong in Node.js, Express, React, and REST/OpenAPI design. Actively seeking SDE II roles in Delhi NCR or remote.

SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Python

Backend: Node.js, Express.js, REST API Design, OpenAPI 3.0 / Swagger

Frontend: React, Next.js, Redux, React Query, Material UI, Bootstrap

Databases: PostgreSQL, MongoDB, SQL

Tools & Platforms: Git, Postman, Strapi CMS, Agile / Scrum

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, System Design

WORK EXPERIENCE

Apiwiz | **Software Engineer (SDE I)** *Bangalore, India · Sep 2024 – Present*

- Led end-to-end development of the API Design module — a visual OpenAPI 3.0 specification builder enabling drag-and-drop schema creation, version control, and reusable component libraries, replacing manual YAML editing for API teams.
- Designed and implemented a flow-based API Builder interface allowing developers to visually link, configure, and test API endpoints, reducing API setup time significantly across the platform.
- Enforced OpenAPI compliance and reusability standards across module outputs, ensuring generated specs integrate cleanly with downstream tooling (Postman, mock servers, code generators).
- Collaborated across frontend (React) and backend (Node.js/Express) layers in an Agile environment, delivering features on fortnightly sprint cycles.

Nowfloats (Reliance Jio Platforms) | **Software Engineer** *Hyderabad, India · Jun 2023 – Sep 2024*

- Architected and built the full-stack Jio Loans system, integrated across MyJio app, JFS app, and web — handling loan application flows, eligibility checks, and state management for a large-scale consumer base.
- Developed the official Jio Finance website using Next.js and Strapi CMS, delivering a performant, SEO-optimised public-facing platform.
- Delivered key frontend features for the Boost platform including pagination, rich text editing, and UI performance optimisations, improving usability for thousands of business users.

PROJECTS

Cloud Desktop Environment · *MERN Stack*

- Built a browser-accessible Linux cloud desktop using the MERN stack, enabling users to spin up and interact with virtual Linux environments over the web via a secure, real-time interface.
- Implemented session management, terminal emulation, and real-time I/O bridging between the browser client and containerised Linux instances.

EDUCATION

B.Tech in Computer Science and Engineering *NIET, NCR · 2019 – 2023 · CGPA: 7.5*
